

PROACTIVE EXPOSURE MANAGEMENT WITH SAFE REMEDIATION ACROSS THE ENTERPRISE

Analyze, prioritize, and remediate active vulnerabilities across your organization with the combined power of CrowdStrike's Exposure Management and Veriti's Exposure Assessment and Remediation.

EXECUTIVE SUMMARY

The integration of CrowdStrike's Exposure Management with Veriti's Exposure Assessment and Remediation delivers a comprehensive solution for managing and mitigating vulnerabilities across your entire security stack. This powerful partnership provides a continuous analysis of all active vulnerabilities within your organization, prioritizing them based on the availability of your compensating controls. With Veriti's advanced automation capabilities, the most critical vulnerabilities can be remediated swiftly and safely by directly mobilizing relevant security controls, all while ensuring business continuity.

EXPOSURE MANAGEMENT AND AUTOMATED REMEDIATION

CrowdStrike's Exposure Management and Veriti's Exposure Assessment and Remediation work in tandem to provide a proactive and efficient vulnerability management solution. By conducting continuous analysis, this integration identifies all active vulnerabilities within your organization, ensuring no risk goes unnoticed. The solution then prioritizes these vulnerabilities based on the availability of compensating controls, focusing on those that pose the most significant risk and can be effectively mitigated immediately. Veriti's exposure remediation capabilities allow for safe and direct remediation by mobilizing the relevant security controls, ensuring that vulnerabilities are addressed without disrupting business operations.

SOLUTION BENEFITS

Enhanced Threat Visibility – Gain comprehensive visibility into threats across your entire security ecosystem

Proactive Security Measures – Proactively enforce protections based on the latest IoCs and threat indicators, tailored to your organization's specific risk profile.

Reduce operational complexity - by managing and enforcing threat intelligence across all security controls from a single platform, ensuring a coordinated and efficient response to emerging threats.

Customizable Defense – Tailor your security defenses by defining specific protection parameters, such as geolocation, industry focus, and targeted adversary groups, to ensure optimal protection for your organization's unique threat landscape.

KEY FEATURES:

Continuous Exposure Analysis

Prioritization by Available Compensating Controls

Safe and Direct Remediation
